

Rock Splitting Expansive Mortar

Rock Splitting Mortar is the answer when your job calls for the demolition of rock or concrete by non-explosive or low vibration means. Rock Outcroppings, Boulders or reinforced concrete can be easily split and fractured, speeding its removal.

- **RockFrac® has proven to be more reliable than Bristar, Betonamit, FRACT.AG, S-Mite, Dexpan and *Dā-mite***
- **Eliminate: vibration from blasting, fly rock, permitting, seismic and explosives monitoring.**
- **Minimize vibration from large breakers.**
- **Exploits the Tensile strength of even the hardest rock**
- **Reduces removal time, saving time and money.**
- **The Fracturing increases productivity of equipment**
- **Environmentally friendly**

- **Safe and Easy to Use**
- **Economical**
- **Reliable**
