

Mixing Instructions

Pre marked container for mixing water, mark 1.5 US qts (48 oz) (1.45 L) for one bag, 3.0 US qts (96 oz) (2.9 L) for 2 bags.
Available at Wal-Mart.

Easiest way to mix material is in a 5 gallon pail.

Mixer drill, heavy duty 1/2 drill works best.

Mixer paddle, best is from QEP, Miami FL, "Super Mixer" second best is double 5 bladed propeller type used for drywall.

Don't load if temperature of material to be loaded is above 70F, use ice in the water at all times.

Use good rubber gloves for skin protection.

Wear eye protection

Very important: Clean out mixing bucket from all residue from prior batch before mixing new batch.
